

Die holder with replaceable segments

Die holder with replaceable segments

Feuerbacher tensioning key 100.400 FF

Height 100 mm, width 110 mm, length 400 mm

Cup spring package inside

Self-locking surface

Thread W1"

Angles 15°/0°

Details of application

Field of application is the forging of **high-tensile material**.

Extensive welding of the complete die surface or shrinking of the holder inserts is not necessary.

Depending on the degree of abrasion, it is possible to move a single segment to a different position or to replace it.

The segments will be inserted from the side and fixed with two Feuerbacher tensioning key.

The segment carrier can be installed on any segment holder.
